

Notes to the Town

Quick reminders and actions of the Board in response to concerns to share with you today.

Monday, July 5, 2004 in celebration of Independence Day the Town Hall is closed for business. Town Highway Department is closed Friday, July 1, 2004 through Friday, July 9, 2004 as their annual shut down week.

Transfer Station has roll-off dumpsters on site beginning this Saturday and all through the month of July. The roll-offs are for large debris items that would not normally be accepted at the transfer station on a regular basis. Your punch card acts as payment for large items as well as bagged debris. It is important to note that NO CASH is accepted at the transfer station. Residents must have a punch card to use transfer station disposal for bagged debris. There is no fee for recyclables and tree trimmings and yard waste.

Summit Street Sidewalks, grant project – The Town Board has received significant appreciation for the sidewalks, recognizing the increased traffic vehicular and pedestrian caused by creation of Bunnell Park and location of the Jr.-Sr. High School between South and Summit Street Roads.

Safety concerns voiced by residents were addressed at the last Town Board meeting. These issues include, speed limit, sidewalk proximity to road, lighting, and road striping. At the end of our discussion, the Town Board will take the following actions:

Speed limit request by resolution has been filed to reduce speed limit from Village line to 9303 Summit Street Road to 30 miles per hour. The Sheriff's Office has been very responsive to Town Board request to patrol traffic during high time periods. This request will follow the required review process of local, regional and state review.

The Town will address the proximity of sidewalk and road through safety signage and road striping to delineate the driving lanes.

Additionally, investigate the need/possibility for increased lighting on the curve to add safety at nighttime and during snow events.

Citizens can be a factor in creating a safe environment throughout our community by driving the speed limits as posted and be aware of driving conditions at all times.

Thank you for constant communication with the Town Board. Have a Happy and Safe July 4th Holiday.

Shelley Stein, Supervisor 768-6910 ext. 231
